12 Major Areas

- Main multan road chuungi
- 80 feet road kharak ganda nala
- Peco road mandi stop
- Kharak main bazar
- Awan town

13 Problematic Areas

Kharak Naala:

Kharak nala is one of main problematic area of UC 110.

Observations:

- Containers were over flowed in this area.
- Solid waste around the area was observed.

**Özkartallar Campak Joint Venture
Sikandriya workshop 2**

Recommendations:

- More containers should be placed to cover overflowing of waste from the container.
- Gang activity should be accelerated to clean surrounding area of kharak nala.

Main Peco Road.

Observation:

- Mainly small heaps were observed after 9 AM.

Recommendation:

- Worker should be instructed to lift these heaps by hand carts or pack the waste in the bags.

14 Open Plots:

Almost in all UC's of zone open plots are exist. These open plots are major hurdle in cleaning operation. To maintain the cleaning of open plots is quiet hard because of the immature attitude of residence and walking people (non-residence).

Solid waste types:

Different solid waste types are observed in these open plots.

*Özkartallar Campak Joint Venture
Sikandriya workshop 2*

- Inorganic
- Organic
- C & D waste
- Green Waste
- Animal waste

Measurements:

To maintain the cleaning of open plots an operational strategy has been developed and also **door to door waste** collection has been focused more to make open plots cleaning operation more effective.

Group activity:

15-20 people group activity has arranged on regular basis to cover-up the cleaning of open plots.... Machinery is also used to clean up where an open plot cannot be handled with manual sweeping.
